

Basketball Dice v0.4 - Possession Flow

Count one possession at the start. Stop when the possession ends. Offensive rebounds loop without adding another possession.

Step	Action	Do this
1	Mark POSS	Add 1 team possession for the offense.
2	Loose foul	Roll d100. 01-07 = defensive non-shooting foul. Assign PF; continue.
3	Pick player	Roll d100 on offense Use table.
4	Action range	TOV = player TOV + def TO Press - off TO Protect. FD = player FD + off Foul Draw - def Foul Disc + 1.
5	Action roll	01-TOV = turnover. Next FD numbers = shooting foul. Higher = shot attempt.

Branch	Result	Procedure
A	Turnover	Record player TOV and team TOV. Roll d100: 01-60 = defense steal. Assign STL. Possession ends.
B	Shooting foul	Assign defender PF. Shooter gets 2 FTA. Roll each FT vs player FT. Possession ends.
C1	Shot type	3PT chance = player 3F + off 3PT Tend. Roll d100. Within chance = 3PA; otherwise 2PA.
C2	Make roll	2P/3P make = player 2P/3P + off ShotQ - floor(def DEF / 2) - 1. Roll <= make = made.
C3	Made shot	Record FGA/FGM/PTS; 3PA/3PM if three. Assist: made 2 = Team AST; made 3 = Team AST + 8. Possession ends.
C4	Missed shot	Record FGA; 3PA if three. Missed 2 only: block chance = 7 + def DEF. Then rebound.
C5	Rebound	ORB chance = 27 + off ORB - def DRB. If ORB, assign OREB and return to Step 2 without adding possession. If not, assign DREB and end.

No FGA on shooting fouls. No new possession on offensive rebounds. Maximum 2 offensive rebound extensions per possession.
